

## ESTEGALLE'S CALENDAR

There are 13 months of 28 days, totaling 364 days in a year. This campaign begins in the Gaile Common Year of 575. The calendar of Mauridia rejects the Avadain use of the Gaile Common Year and bases their year, 1610, upon the foundation of Estelline in 1035 Pre-Common Year. The seven days in each week are: Moonday, Earthday, Waterday, Skyday, Godsdays, Starday, and Sunday. Each month begins with a new moon and consists of 4, 7-day weeks. Elves and dwarves use the month-names of The Great Dominions while most evil humanoid and giants use the month-names of Carmascia. The months and their corresponding seasons are:
